YOUR WINGS

IT'S HARD ENOUGH worrying how you're going to make it through a long, busy day of working, playing and commuting — never mind worrying how your delicate electronics are going to stand up to the stress. So Cocoon Innovations developed a line of bags designed around "The Grid," (pictured) a flexible solution for organizing and protecting iPods, iPhones, BlackBerrys, cameras and the other ephemera you tote with you daily. The full line includes laptop bags, totes, portfolios, Transportation Safety Authority-friendly bags for easy flying and accessories that will change the way you organize your expeditions through the urban jungle.
